Cold Water

Portable

The Alkota 219CSE Electric Pressure Washer is a reliable, industrial-grade unit designed to handle a variety of everyday cleaning tasks with ease.

Powered by a single-phase, 15-amp induction motor, it delivers up to 1,500 PSI and 1.5 GPM, along with built-in thermal protection for safe, consistent operation. At the heart of the machine is a durable brass-head triplex pump featuring ceramic plungers, providing smooth performance and long service life.

For added convenience, the 219CSE includes a detergent suction hose with a filter—simply place the hose into your detergent container to start applying soap right away.

Mobility is straightforward and flexible. Use the top-mounted handle for quick transport, or add the optional wheel kit for easier movement across larger areas.

With its balance of power, durability, and ease of use, the 219CSE is well-suited for a wide range of cleaning applications.
